

SUCCESS CRITERION 2.4.12 · LEVEL AAA

Focus Not Obscured (Enhanced)

“I need clear sightlines to navigate — ensure nothing's hiding my focus, not even a pixel!”

Who this helps: Visual Impairments, Motor Impairments

Focus Not Obscured (Enhanced)

When a user interface component receives keyboard focus, no part of it is obscured by other content, ensuring complete visibility of the focused element.

Principle 2: Operable

Guideline 2.4: Navigable

What each role can do

Product manager

Aim for the highest level of clarity by ensuring that no focused component is partially or fully obscured.

Designer

Design the user experience to keep the focus area completely unobscured, regardless of the site's dynamic content or overlays.

Developer

Develop web pages so that focused elements are always fully visible and not covered by any author-created content.

Tester

Conduct thorough accessibility testing to ensure that when elements receive focus, they are entirely visible.

Once it is fixed

“Spotlight on what matters — my focus. Thanks for making sure nothing gets in its way, not even for a second!”

WCAG Quotes

Every WCAG 2.2 success criterion,
told by the person it helps.

mpaiva.com/wcag-quotes/2-4-12-focus-not-obscured-enhanced

The quotes are written to illustrate the criterion. They are not testimonials from real people.
